

SWETHA S

Computer Science Engineering Graduate

+91 8610501896 | swethasathaiah6@gmail.com | [LinkedIn](#) | [GitHub](#) | [LeetCode](#) | Chennai, India

PROFESSIONAL SUMMARY

Junior Software Developer with hands-on experience in Java Full Stack Development, building secure, scalable web applications using Java, Spring Boot, REST APIs, MySQL, Hibernate, and JWT Authentication across two internships. Strong foundation in Data Structures, Algorithms, and Object-Oriented Programming, with 100+ LeetCode problems solved. Experienced in Agile/Scrum development, version control (Git/GitHub), and API testing (Postman). Quick learner with a track record of delivering clean, maintainable, production-oriented code.

CORE TECHNICAL SKILLS

- Programming Languages:** Java, Python, JavaScript, SQL
- Backend Development:** Spring Boot, REST API Design, JWT Authentication, Hibernate, Java OOP
- Frontend Development:** HTML5, CSS3, JavaScript, Angular
- Database:** MySQL, Database Design, CRUD Operations
- Tools & Practices:** Git, GitHub, Maven, Postman, IntelliJ IDEA, VS Code, Eclipse, Cloudinary
- Computer Science Fundamentals:** Data Structures & Algorithms, Problem Solving (100+ LeetCode problems)

INTERNSHIP EXPERIENCE

Java Full Stack Developer Intern | Amdox Technologies

Jan 2026 – Apr 2026

- Built a full-featured Task Management System using Java, Spring Boot, MySQL, JWT Authentication, and Cloudinary, supporting concurrent users across Admin and Standard roles.
- Implemented JWT-based authentication and role-based authorization (RBAC) for secure access control across Admin/User accounts.
- Designed and developed 43+ REST APIs and 10 relational database tables following modular, maintainable backend architecture.
- Collaborated in an Agile/Scrum environment — participated in sprint planning, stand-ups, and code reviews, maintaining well-documented code across GitHub commits.

Java Full Stack Developer Intern | TVK Technologies

Jul 2026 – Aug 2026

- Developed web applications using Java and full-stack technologies, gaining hands-on experience in backend development, database integration, and frontend implementation.
- Collaborated with mentors and cross-functional team members on software development best practices including debugging, unit testing, and feature development.

PROJECTS

Job Tracking System — Java, Spring Boot, Angular, TypeScript, MySQL, REST API

- Developed a full-stack job application management system using Spring Boot (backend) and Angular (frontend).
- Designed and implemented REST APIs for complete CRUD operations on job application data, integrated with Angular services for real-time data operations.
- Built dashboard views, search, and navigation components; implemented HTTP error handling and custom 404 routing.

Task Management System [Link](#) — Java, Spring Boot, MySQL, Hibernate, JWT, REST APIs, Cloudinary

- Engineered a secure task management application with 43+ REST APIs and 10 database tables using Spring Boot, Hibernate, and MySQL.
- Implemented role-based authentication/authorization for Admin and User workflows; integrated Cloudinary for secure cloud file uploads.

IoT-Enhanced Sign Language Glove [Link](#) — Arduino, Flex Sensors, Bluetooth

- Designed a hardware-software system for real-time sign language translation using flex sensors, Arduino, recognition, achieving 75% gesture accuracy.
- Research presented at ICASEM 2025 international conference, demonstrating measurable accuracy gains for accessibility applications.

Career Guidance Web Platform — HTML, CSS, JavaScript

- Built a responsive web platform delivering personalized career recommendations to students, with backend integration for data processing.

EDUCATION

B.E., Computer Science Engineering

Graduated Mar 2026

Jerusalem College of Engineering, Chennai | CGPA: 8.66

CERTIFICATIONS

- TCS iON National Qualifier Test (NQT) Certification
- HackerRank Java (Basic) Certification

ACHIEVEMENTS

- TCS iON NQT: Scored 69.02% overall — Java Programming 72.52%, Advanced Quantitative & Reasoning 77.69%.
- Solved 100+ LeetCode problems focused on hashing, arrays, binary search, and stack-based patterns.
- Innovative Project Award — Computer Society of India (Kancheepuram Chapter), for technical excellence and real-world problem-solving.
